

*„Oracle Application Express (APEX) is a low-code development platform that enables you to build stunning, scalable, secure apps, with world-class features, that can be deployed anywhere. Oracle APEX is the native Web application development framework for the Oracle Database.”*

# Plugins we use

## Advanced & reusable components

Bartosz Ostrowski

# What are Oracle APEX plugins?

- Ready to use
- Black BOX
- Open code
- Community wanting to help
- Free to use (MIT license)

## Why YOU should use them

- To save your time
- To save your money
- To enhance your applications
- To fill the gap left in APEX

# Drag & drop

The screenshot shows a web application interface. On the left, there is a sidebar with a list of items, including names and icons. The main area on the right is a large text editor or message composition area. It has a header bar with the text 'Upuć, by załączyć' and a close button. Below the header, there are fields for 'Do' (To) and 'Temat' (Subject). The main body of the text area is a large rectangle with a dashed border, containing a placeholder image of a Google logo and the text 'Upuć pliki tutaj'. At the bottom of the text area, there is a toolbar with various icons for text formatting and a 'Wyslij' (Send) button.

Phase 3 - sprint 1

Description

Visual improvements

- reports list with missing first column header and the text which should be displayed
  - MIS Administration Dashboard - Reserves - Reserve Level (First column should be called "Calendar Month")
  - MIS Overview - Loss Ratio CY - Total (First column should be called "Calendar Month")
  - MIS Overview - Loss Ratio CY - IBNR Details (First column should be called "Calendar Month")
- reports list with first column length to be adapted
  - MIS Administration Dashboard - Reserves - Reserve Level (First column max length is VARCHAR(10))
  - MIS Overview - Loss Ratio CY - Total (First column max length is VARCHAR(10))
  - MIS Overview - Loss Ratio CY - IBNR Details (First column max length is VARCHAR(10))
- Policy List "Export" link next to the Check Impact so that we can reduce the space lost between filters and export
- Remove the page header displayed under tool bar (duplicated information already presented in the tool bar), current date time visible on the left side should be kept (all pages)
- reduce the size of the filters region items including Active Filters, Filters button (all pages where filter region is visible)
- remove report region title (reports are rather self explanatory)
- aligning the header columns accordingly to the column content (review all reports)
- reduce size of fonts
